Re: Letter of Endorsement for Turtle Survival Alliance Canada (TSA Canada)

“Turtles are among the most at-risk groups of wildlife in Canada, facing mounting pressures from habitat loss, road mortality, climate change, and other human-driven threats. Since 2016, the Canadian Wildlife Federation has been actively engaged in turtle conservation across the country, working with partners to advance science-based recovery, public engagement, and on-the-ground action. Despite important progress, the scale and urgency of the challenge make clear that much more must be done to secure a future for Canada’s native turtle species.

We are therefore delighted to endorse the mission, leadership, and collaborative approach of Turtle Survival Alliance Canada. Their deep expertise, dedication to species recovery, and commitment to partnership align closely with CWF’s own conservation values and priorities. We see tremendous opportunity in working together to strengthen conservation outcomes, raise public awareness, and accelerate coordinated action for turtles and the habitats they depend on. We look forward to a strong and impactful collaboration in support of turtle conservation in Canada.”
